WORKPLACE WELLBEING CHALLENGES

Are you concerned about the physical and mental health of your teams working remotely, hybrid or back in-office? With **back-to-back meetings, screen fatigue, and mental health issues** on the rise (more than three-quarters of people claim their mental health has worsened since the outbreak of COVID-19), it can be challenging for people working at a desk to **disrupt long periods of sitting**; to motivate themselves, to find the time, to remember, or to even know what to do.

WELLNESS MADE EASY

The workplace is recognised by the World Health Organisation as an important space to promote health and disrupt sedentary behaviour. The good news is that you don't need to spend hours away from your computer to meet the **WHO's guidelines for breaking up sitting time**. Brief movement and mental breaks have been proven to dramatically improve memory and creative output plus contribute significantly to **productivity, focus, longevity and wellbeing**.

BITE-SIZE WELLNESS BREAKS
